Executive Summary

Logate Mobile Banking Application enables users to access their bank accounts, make all types of payments, view transaction history, locate the nearest bank's branch office and many other options anytime and anywhere using their smartphone.

With Logate Mobile Banking Application users can:

- Have quick insight into the current and foreign currency accounts, as well as an insight into history of carried transactions and payments.
- See the status of all payment cards and historical view of transactions made by them.
- Make payments through pre-created or pre-defined templates. Additionally, legal entities have the possibility to authorize and verify accounts, or cancel verified ones.
- Have quick overview of active savings status, with all belonging details.
- Check the status of active loans and all the details regarding it.
- Use additional functionalities, such as: News, Maps, Tools, Problem Report and Settings.

About us

"At Logate, we value professional, high quality and above all human approach to our clients and their needs."

Ivica Tatar
Co-Founder & Strategy Lead

Logate is a team of multi-disciplinary IT professionals, who enjoy fast-paced and dynamic business environments, where we can thrive by never solving the same problem twice.

Our clients come in different shapes and sizes, and tend to stick with us. We are very proud of maintaining long-term business relationships with regional industry giants from Telco and Finance sectors.

Our team of technical experts has hundreds of years of collective experience in developing, maintaining and supporting enterprise-grade software solutions.

Geeks at heart, we aim to provide complete solutions based on Linux and Open Source technologies.

We also take time to thoroughly understand our clients' requirements and their business.

We specialize in:

- Design and development of software solutions using modern technologies and processes
- Support and maintenance
- IT consulting
- Design and development of applications and systems based on Open Source technologies
- Design of computer networks and network environments
