affordable, business-class solution
ready to meet the needs and
requirements that matter

OpenMX

Scalable, flexible, fast and secure carrier
grade e-mail Exchange System designed to
serve millions of users.

A few words from your colleagues

Radovan Vukotić

Manager for Services and Platforms,
Crnogorski Telekom

“

OpenMX platform provides mail service to over than 100.000 CT customers for more than 10 years period. During that time we have had an excellent cooperation and good experience with our partner Logate who is constantly improving system and customer experience.

”

More than benefits

io

Cost-effective

Save time and money

No one has time to learn every skill or hire every person necessary to run a business. We'll enable you to run your business smoothly by getting all the professional services needed to work and track your client's spending.

Perhaps the biggest benefit is cost savings. There are no additional investments in the system, hiring additional staff and with affordable product price the number of users will increase.

Support

24/7/365

We make support a big focus in our business, so you can focus on your business. OpenMX team provides support through our knowledgeable locally based service team.

Always ready to help whenever you have questions or issues. Contact is available via ticket, e-mail, chat or phone — all delivering fast response any time of day or night.

Security

Multiple stage security features

OpenMX provides full feature anti-virus stack which could be coupled with any commercial anti-virus solution. Also, we provide anti-spam solution with distributed learning capabilities, which is configured system wide, and additionally, customized by end user preferences.

Spam learning process is easy as moving messages from one folder to another.

OpenMX follows your Business Needs

Charging functionalities

Ideal functionality for providers that allows maximum usability of OpenMX e-mail system. After new user domain registration, company admin on the basis of monthly consumption data can suggest service improvements for each user.

OpenMX can help you to create invoices for your customers with just few clicks. Based on your business logic OpenMX collects all data necessary for creating invoices.

The background is a dark teal color with a network of glowing teal circles and lines. The circles vary in size and opacity, some appearing as soft bokeh. The lines are thin and connect some of the circles, creating a sense of a digital network or data flow. The overall aesthetic is modern and tech-oriented.

OpenMX product highlights

logate

Open source technology

OpenMX core mail services are based on proven open-source software, supporting all standard email protocols and services. Authentication mechanisms are based on LDAP, allowing easy integration with any popular directory services like OpenLDAP, Samba or ActiveDirectory.

Opensource LDAP service is integral part of OpenMX. OpenMX supports server side email filtering via SIEVE protocol.

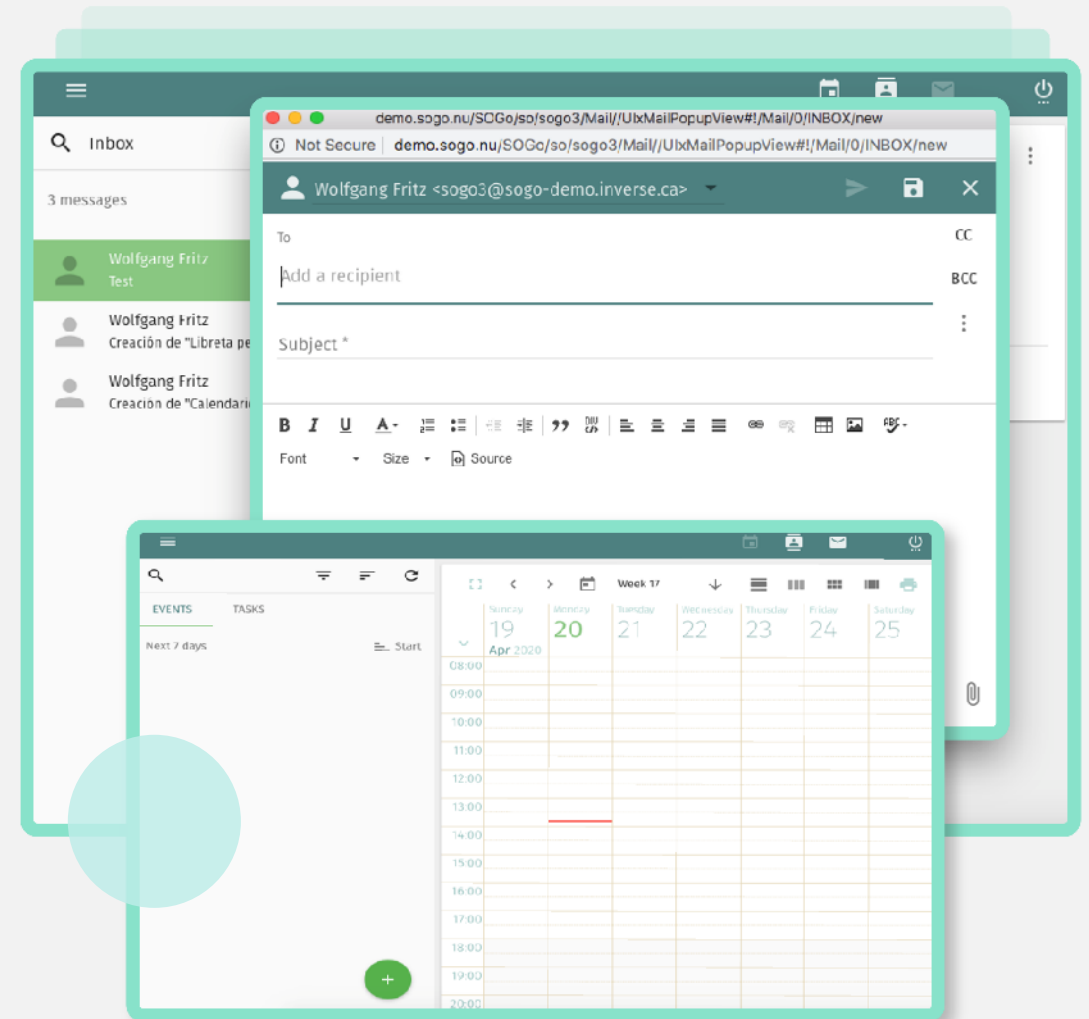

Features

Webmail pool

SOGo is default Webmail solution for OpenMX.

SOGo is a fully supported and trusted groupware server with a focus on scalability and open standards. Provides native Microsoft ActiveSync support.

Mobile devices such as Apple iPhone, Android, and Windows Phone can fully synchronize emails, contacts, events and tasks.

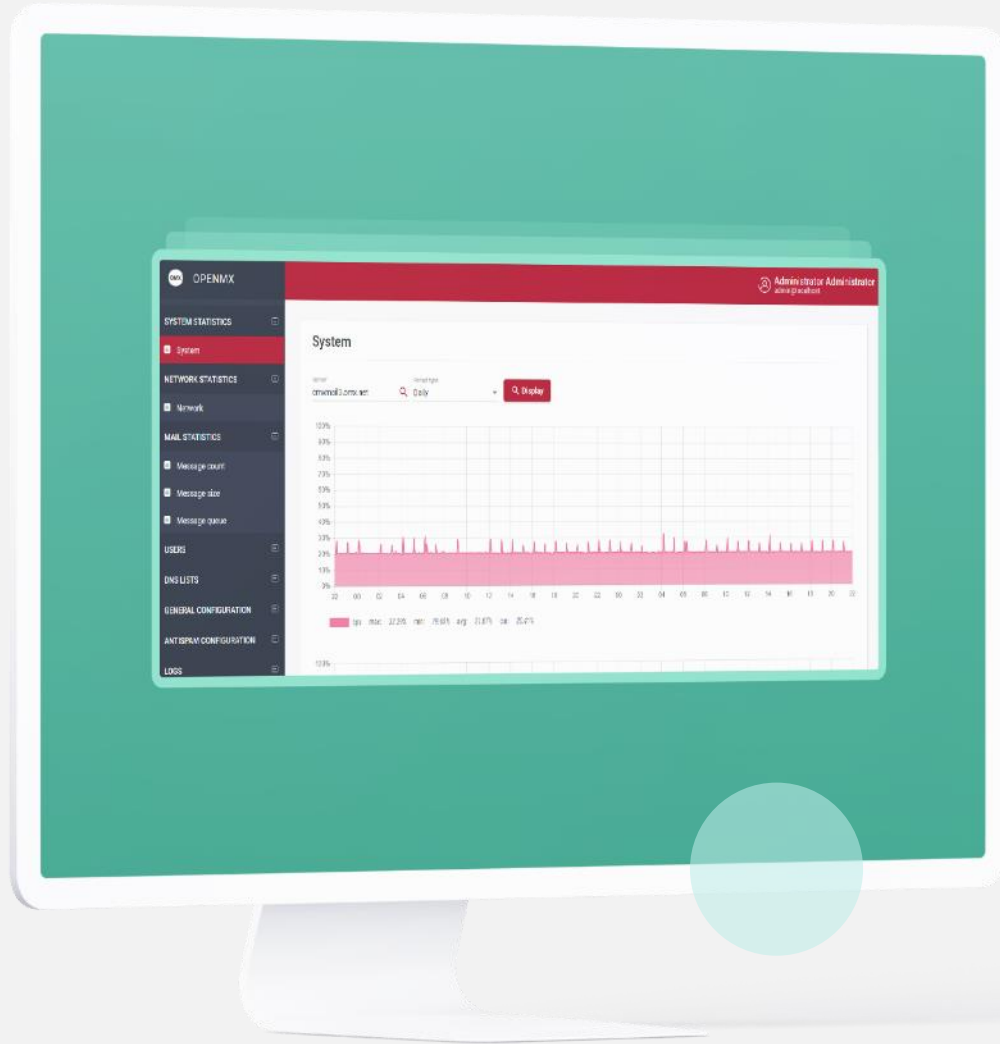

Management pool

Management pool has purpose of controlling OpenMX system, while providing connections to remote provisioning software.

Admin interface

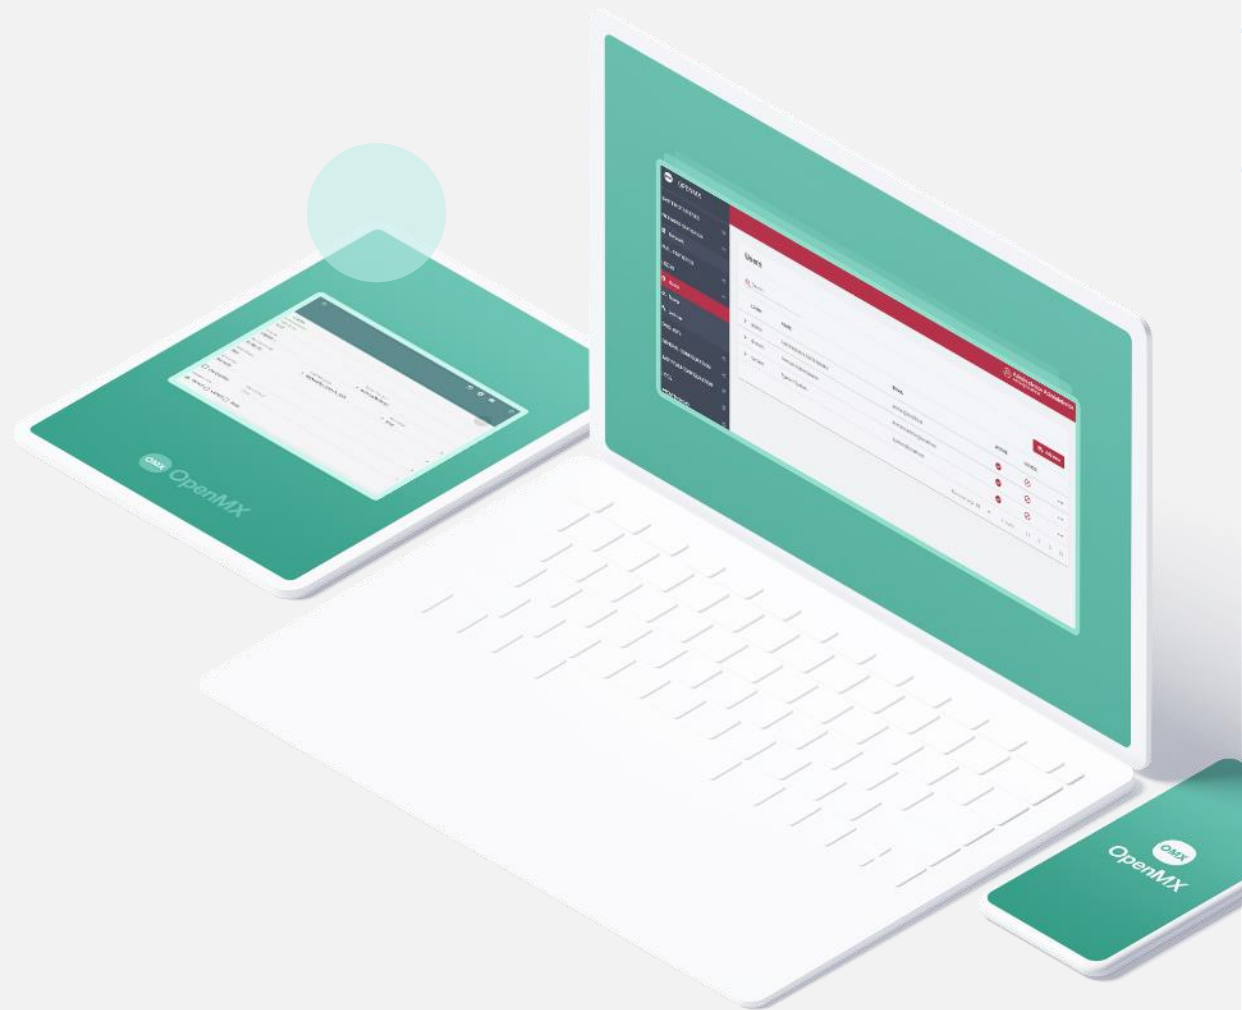

Administration interface is part of OpenMX solution that provides standard monitoring and system configuration as well as follow up of relevant system and mail statistics, enables previews and log search in real time.

Management pool

Domain administration interface

DA (domain administration) interface is intended for business administrator of the domain for managing users and price plan activations per user

The background of the slide features a close-up of two hands holding and lighting sparklers. The sparklers are emitting bright, golden sparks that catch the light. The background is dark, with several out-of-focus light sources creating a bokeh effect. The entire image is framed by a thick orange border on the top and sides, and a teal border on the bottom and left sides.
