

Introducing AAA for fixed Internet

Customer

Mtel Austria is an Austrian telecommunications company founded in 2014. It offers services around mobile telephony, digital television and internet services for the home under one roof. The company also offers integrated business solutions with voice and data transmission in mobile communications to the business users in Austria. Mtel Austria is a part of Telekom Serbia group.

Project background

After successful implementations of AAA system for fixed and mobile internet in Telekom Srbija, Logate got a recommendation to implement OpenProvider AAA for Mtel Austria. The requirement was to implement the AAA solution to support the new, fixed internet service of the provider. Through this project, OpenProvider AAA was for the first time implemented for a MVNO (Mobile Virtual Network Operator).

The solution and the benefits

Through the project for Mtel Austria, Logate successfully implemented:

✓ **OpenProvider** for policing, assigning **IPv4** and **IPv6** addresses as dual stack solution and redirection to NOC portal for suspended or disabled subscribers.

✓ **Customer Database (CDB)** for all Mtel Austria subscribers which is integrated with **CRM** via REST and **OpenProvider** via LDAP protocol

The solution implementation allowed the customer to launch the new service - fixed internet, and perform authentication, authorization and accounting of the service seamlessly.

Team capabilities:

- ✓ Solution design
- ✓ Project Management
- ✓ System Integration

- ✓ Data migration
- ✓ Training and education
- ✓ 24x7 remote support

Testimonial

Logate's understanding of our network architecture, requirements and our business goals, along with their in-depth telco expertise added significant value to the project of the new AAA implementation, allowing us to launch our fixed internet service without any discontinuities.

*Stefan Božić, CEO
